

Emerging Pest Management Challenges 2009: The Presenters

Mathew Kaye, CEO Brandenburg UK (Key Note Speaker). If you are in pest control, chances you would have used a Brandenburg product...now hear from the man behind the company. Mathew will be discussing the future of the pest management industry, notably on means to providing pest solutions using systems based on *activity levels* opposed to *service intervals*.

Prof. Richard Russell, Department of Medical Entomology, University of Sydney and Westmead Hospital. Global warming and climate change will affect how you and your business will operate in the future. Richard is a world authority on mosquito control, yet is climate change as a hot prospect that we think it is, hear from the expert?

Dr Don Ewart, consulting Entomologist. With over 30 years experience, Don is a leading identity in termite management in Australia. His presentation focuses on the emerging challenges and opportunities in termite management.

Gavin Hall, DeGroot Technical Services. Gavin is well versed in the area of insecticides, being the former manager of the Insecticides team, Pesticides at the APVMA. He will be discussing insecticide action and the challenges this presents for the pest manager.

Peter McCarthy, Pest IT. Peter is an Australian leading authority on bird control. In his presentation, Peter will be discussing a new and emerging technology; bird control in open spaces.

Stephen Doggett, Department of Medical Entomology, Westmead Hospital. Bed bug management is the most dynamic area of research for any pest in the world today. Hear about the various innovations and the challenges they present to the pest manager from Australia's own 'Mr Bed Bug'.

Ben Boyd is with the Australian Quarantine & Inspection Service. Ben will be discussing potential urban pest threats and the pest managers involvement if (and when) these pests are introduced into Australia.
